

Data Analysis and Visualization using Excel

Week 12 Challenge

Your Manager asked you to mail the following mentioned employees with corresponding Subject and Body. Write a VBA code to automate the work.

```
Public Sub Email()
```

```
Dim i As Integer, Mail_Object, Email_Subject, o As Variant, lr As Long
```

```
lr = Cells(Rows.Count, "A").End(xlUp).Row
```

```
Set Mail_Object = CreateObject("Outlook.Application")
```

```
For i = 2 To lr
```

```
    With Mail_Object.CreateItem(o)
```

```
        .Subject = Range("B2").Value
```

```
        .To = Range("A" & i).Value
```

```
        .body = Range("C2").Value
```

```
        .Send
```

```
    End With
```

```
Next i
```

```
MsgBox "E-mail Successfully sent", 64
```

```
Application.DisplayAlerts = False
```

```
Set Mail_Object = Nothing
```

```
End Sub
```
